METHOD SYSTEM AND METHOD SYSTEM FOR CONVEYING AN IMAGE
POSITION

ABSTRACT OF THE DISCLOSURE

The invention concerns a system (100) and method (300, 600) of conveying an image (400, 700, 800) position. The method includes the steps of displaying (312, 612) at least a portion of an image on a display (112) and modifying (314, 614) the portion of the image to convey to a user a position of the portion of the image in relation to the entire image. The image can include a background (412) and at least one symbol (410) superimposed on the background. The modifying step can include graduating (316) the contrast of at least a portion of the background in relation to the symbols. In addition, the step of graduating the contrast includes varying (318) at least one of the hue, brightness and saturation of the background.
